Passionate About Supporting Researchers of the Future? Join the Foundation for Health Advancement As We Embark On A New Program

New Brunswick, NJ—If you are passionate about advancing science, research and education in New Jersey, consider supporting a Science, Technology, Engineering & Mathematics (STEM) program at the high school level.

“The Foundation for Health Advancement, a New Jersey Health Foundation affiliate, is starting a new program to raise funds for deserving STEM projects at the high school level,” explained James M. Golubieski, president. “Gifts will provide grants for high school projects that challenge students to explore STEM concepts in innovative ways.”

To support the effort, New Jersey Health Foundation has committed matching gifts up to a total of \$5,000.

According to Mr. Golubieski, the program was established to encourage future researchers as they begin to explore their interest in the sciences while in high school. These advanced programs better prepare students today to contribute to life changing discoveries tomorrow.

Every gift is important and 100% of each dollar donated will go directly to support STEM programs. As a 501(c)(3) organization, donations to the Foundation for Health Advancement are tax deductible to the fullest extent permitted by law.

To participate, donate at www.foundationforhealthadvancement.org or at www.gofundme.com/supporting-stem-education-in-nj. Or send a check made out to **The**
